- Practice Regularly with Sample Questions

Consistent practice with a variety of problems enhances problem-solving speed and accuracy.

Sample Maths Olympiad Questions for Class 5 with Solutions

To illustrate the nature of Olympiad questions, here are some sample problems along with detailed solutions:

Question 1: Number Pattern

What is the next number in the sequence: 2, 6, 12, 20, ?

Solution:

Observe the pattern:

- 2 to 6: +4
- 6 to 12: +6
- 12 to 20: +8

The differences increase by 2 each time: 4, 6, 8.

Next difference should be 10:

$$- 20 + 10 = 30$$

Answer: 30

Question 2: Geometry and Symmetry

How many lines of symmetry does a regular hexagon have?

Solution:

A regular hexagon has six equal sides and angles. It has lines of symmetry passing through each vertex and the midpoint of the opposite side.

- Number of lines of symmetry in a regular hexagon = 6

Answer: 6

Question 3: Word Problem

A basket contains 24 apples. If $\frac{1}{4}$ of the apples are green, how many green apples are there?

Solution:

Calculate $\frac{1}{4}$ of 24:

$$- \left(\frac{1}{4}\right) \times 24 = 24 \div 4 = 6$$

Answer: 6 green apples

Question 4: Prime Numbers and Factors

Find the smallest prime number that is greater than 20.

Solution:

Prime numbers greater than 20 are 23, 29, 31, ?

The smallest among these is 23.

Answer: 23

Question 5: Logical Puzzle

Tom has 3 boxes. One contains only apples, one contains only oranges, and one contains both apples and oranges. The boxes are incorrectly labeled. If you can pick only one fruit from one box to correctly label all boxes, how can you do it?

Solution:

- Pick one fruit from the box labeled "Mixed."
- Since the label is wrong, this box does not contain both fruits. It must contain only apples or only oranges.

- If you pick an apple from this box, then:
- The box labeled "Oranges" cannot contain only oranges (since labels are wrong), so it must contain both fruits.
- The remaining box, labeled "Apples," must contain only oranges.

This process allows you to correctly label all boxes with just one pick.

Answer: By drawing one fruit from the box labeled "Mixed" and using the process of elimination.
